Education

COMSATS University Islamabad

Bachelor of Science in Software Engineering — Lahore, Punjab

CGPA: 3.1

Feb. 2023 – Jan 2027

Relevant Coursework

Data Structures • OOP • Database Management • Web Development • UX/UI Design • Machine Learning

Experience

Dev Solutions

Spring Boot Developer Intern

– Building REST APIs using Spring Boot for backend services and integrations.

2025 – Present

SyntecxHub

Web Development Intern

– Developed web application features using HTML, CSS, and JavaScript.

2025 (2 months)

Code Alpha

Web Development Intern

– Built responsive web pages and contributed to front-end development projects.

2025 (3 months)

Elevvo Pathways

Web Development Intern

– Completed web development tasks using HTML, CSS, and JavaScript.

2025 (1 month)

Projects

Bank Loan Management System | Java, Spring Boot, REST API

- Built REST APIs for loan applications, approvals, and repayment tracking using Spring Boot.
- Implemented layered architecture (Controller, Service, Repository) with JPA/Hibernate.
- Added role-based access control via Spring Security for admin and customer roles.

Full-Stack E-Commerce Website | MERN Stack (MongoDB, Express, React, Node.js)

- Developed a fully functional E-Commerce platform featuring user authentication, product listings, cart management, and order processing.
- Designed responsive UI using React, React Router, and reusable components.
- Created secure REST APIs using Node.js and Express for authentication, products, orders, and users.
- Used MongoDB for real-time database management with Mongoose schemas and optimized queries.
- Implemented Admin Dashboard for managing products, users, and inventory.

Amazon Clone Website | HTML, CSS, JavaScript

- Developed a fully functional e-commerce website replicating Amazon's core features including product listings, shopping cart, and checkout system.
- Designed a responsive interface using HTML and CSS for smooth multi-device browsing.
- Implemented product rendering, cart management, and search functionality using JavaScript.

Weather Forecast Website | HTML, CSS, JavaScript (Fetch API)

- Built a responsive web app providing real-time weather updates using OpenWeatherMap API.
- Implemented dynamic UI updates and integrated asynchronous Fetch API for data retrieval.

Library Management System | *Java, OOP*

- Developed OOP-based console application with core features: add/remove books, issue/return books, search functionality.

Restaurant Management System | *Python, VS Code, SQL*

Dec 2024

- Built a restaurant database system and populated data using custom Python faker script.
- Created SQL views and reports to evaluate system performance.

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript, SQL

Frameworks / Tech: MERN Stack (MongoDB, Express, React, Node.js), Spring Boot

Developer Tools: VS Code, Eclipse, Android Studio

Extracurricular

Literary Society

Spring 2025 – Present

Active Member — COMSATS University

- Won multiple debate competitions while representing the university.
